## Storm Sewer & Road Reconstruction on Beechwood Avenue and other local roads

## Road Reconstruction on Glenridge Avenue

**Contract: 16ECS-TI-01LR**  
**Expected Start Date: August 2, 2016**  
**Expected End Date: November 30, 2016**  
*\*Timeline is subject to change.*

The City of Toronto will install a storm sewer and sidewalk and reconstruct the road on several streets in your neighbourhood (see map below) to match the surrounding streets. As part of the reconstruction of the road, the existing ditches will be removed and a storm sewer installed to drain water from the road. To meet City standards and provide pedestrian connection throughout the neighbourhood, streets without a sidewalk will have one installed. The sidewalk will run adjacent to the road and located on the side of the road. Rolled curbs will also be added. This work will not affect any trees in the community.

This project also involves replacing the City-owned portion of substandard water services. The water service is the underground pipe that brings water to your water house and is owned by you and by the City. The part you own is from your house to the end of your property, the part the City owns is from the end of your property to the watermain.

Storm Sewer, Sidewalk installation and Road reconstruction work will take place on:

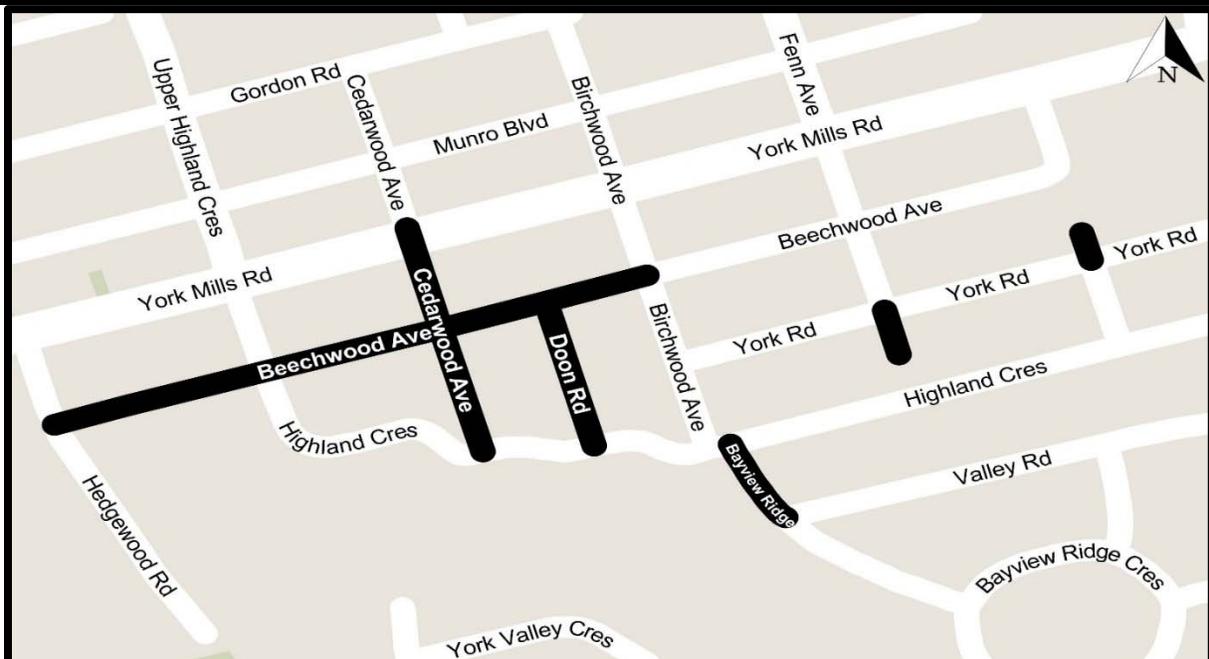

- Beechwood Avenue,
- Bayview Ridge,
- Cedarwood Avenue,
- Doon Road, and;
- Fenn Avenue.

The storm sewer installation is needed to improve drainage in the areas prone to flooding by collecting the storm water and melting snow and releasing it into the river. This project is part of the Council-approved 2016 Capital Works Program that will improve water distribution and the City's aging infrastructure.

### IMPORTANT INFORMATION ABOUT LEAD WATER SERVICES

If you live in a house on the streets shown on the map below that was built before the mid-1950s, your water service may be made of lead. Please read the attached fact sheet with important information about the risks of lead in drinking water, especially if someone in your house is pregnant, there are children under six years old, or there is an infant drinking formula made using tap water.

### MAP OF WORK AREA

## WORK DETAILS

The City's contractor will move equipment on-site and prepare the work area before construction begins. Construction crews will then:

- Replace City-owned service pipes that do not meet City standards (from the watermain to the private property line).
- Install new storm sewers on the roadways.
- Remove the existing asphalt and granular base and replace it with new granular base and asphalt, also install rolled curbs and streets without a sidewalk will have one installed.
- Restore areas affected by construction.

## WHAT TO EXPECT DURING CONSTRUCTION

	<p><b>Work Hours:</b> Work will take place from 7:00 a.m. to 7:00 p.m., Monday to Friday, with work after hours and on weekends as required.</p>
	<p><b>Pre-Construction Inspection:</b> OZA inspections under contract to City of Toronto will survey all properties within 30 metres of the construction area before construction starts. Participation in the survey is voluntary; however, participating is important in determining if the construction caused damage. The inspection will look at both the interior and exterior of all properties to verify existing conditions. The company will deliver a separate notice requesting time to set up appointments. All inspection staff will be wearing photo identification and carrying photographic equipment during their work.</p>
	<p><b>Water Service Disruptions:</b> From time-to-time, the water supply to your property may be shut-off to complete construction; the contractor will provide at least 24-hour advance notice. Throughout the work, it is recommended that you temporarily disconnect any water treatment systems (i.e. softeners or filters), water-cooled air conditioners or similar plumbing fixtures. Automatic lawn sprinkler systems may also be affected, therefore, you may need to water manually. In the event you did not receive advanced notice, an <b>emergency water shut off</b> could have been necessary.</p>
	<p><b>Substandard Water Service Replacement:</b> Please take the time to read the attached fact sheet carefully as it contains important information on lead in drinking water and how to prepare for replacement. If you want to replace your part of the water service pipe, the City recommends you get <b>three quotes</b>. You can contact the City's contractor for one of your quotes.</p> <p><b>Water Service Replacement Contractor:</b>          Company/Contractor: Il Duca contracting inc.          Contact Person: Walter Pannia          Phone: 416-258-3010          Contract No.: 16ECS-TI-01LR</p> <p><b>PLEASE NOTE:</b> (any contract entered into to replace water services is between the home owner and the contractor.)</p>
	<p><b>Road and Sidewalk Access:</b> In order to complete the work in a safe manner, there will be road and sidewalk restrictions within the construction work zone. Access for emergency vehicles will be maintained at all times.</p> <p><b>Driveway Access:</b> The contractor will notify you of any temporary restrictions to your driveway access. If your property has two entrances, one entrance will be kept open at all times.</p>
	<p><b>Traffic Management:</b> Efforts have been made to manage traffic in the area for the safety of workers, road users and residents. Road users should expect delays and increased traffic on nearby main and side streets.</p> <p><b>Traffic on affected streets will be reduced to one lane.</b></p>

	<p><b>Parking:</b> Parking in the active work zone is not permitted due to space requirements for construction equipment and materials. If your parked vehicle affects the construction work, it will be re-located with no charge to the owner. If your vehicle is moved, please contact parking control for its location at <b>416-808-2222</b>.</p> <p><b><i>In the event you receive a traffic ticket for on-street parking during this period of construction, please immediately contact Angela Au (416-392-7756) or give it to the city inspector on site, so that your ticket can be cancelled.</i></b></p> <p>Please note that parking tickets <b>cannot</b> be cancelled if vehicles were parked in illegal parking spots such as in front of a fire hydrant or in no parking zones, or if they are submitted more than <b>three days</b> after receipt.</p>
	<p><b>Garbage &amp; Recycling:</b> Please follow your normal routine. If required, the contractor will move bins to an appropriate location and return them. <b><i>Please ensure that you label your bins with your address.</i></b></p>
	<p><b>Restoration:</b> The construction work area will be restored with sod and/or asphalt where required. Interlocking bricks, flagstone on a granular base, or other similar features that are removed from public and private property during construction will be replaced. Lawn seeding and/or laying of sod will be done as needed during ideal growing seasons only - in the spring (April to June) and fall (September to October).</p>
