Watermain Cleaning and Relining on Military Trail

Contract: 16TW-OS-27CWD
Start Date: Week of February 20, 2017
End Date: May 2017
**Timeline is subject to change.*

The City of Toronto will be cleaning and structurally re-lining the watermain in your area starting mid-February. During this process, the City will also replace the City-owned portion of any substandard water service pipes.

A map of the work area can be found on page 3 of this notice.

The water service is the underground pipe that brings water to your water meter and is owned by you and by the City. The part you own is from your house to the end of your property. The part the City owns is from the end of your property to the watermain.

This project is part of the Council-approved 2016 Capital Works Program to renew our aging infrastructure, improve water distribution and reduce the risk of watermain breaks.

IMPORTANT INFORMATION ABOUT LEAD WATER SERVICES

If you live in a house that was built before the mid-1950s, your water service may be made of lead. Please read the attached fact sheet with important information about the risks of lead in drinking water, especially if someone in your house is pregnant, there are children under six years old, or there is an infant drinking formula made from tap water.

WORK DETAILS

In the first few weeks, the City's contractor will move equipment on-site and prepare the work area before construction begins. Construction crews will then:

- Excavate pits in the road to access the watermain
- Install a temporary water supply system and attach homes to the supply
- Clean and structurally re-line the existing watermain
- Replace any City-owned water service pipes that do not meet City standards (from the watermain to the private property line)
- Remove the temporary water supply and restore all work areas with asphalt, concrete or grass

WHAT TO EXPECT DURING CONSTRUCTION

- You may experience dust, noise and other inconveniences. The City will make efforts to reduce the impacts. We appreciate your patience.
- Property owners should remove items located within City property limits (boulevard), such as landscaping and / or decorative objects. If you have a sprinkler system within the boulevard, please contact the Field Ambassador listed at the end of this notice.
- The City will not be responsible for damage to any privately owned items on City property.

Work Hours: Work will take place from 7:00 am to 7:00 pm., Monday to Friday, with work after hours and on weekends as required.

	<p>Access to Your Home: The City-hired contractor may need access to your home to complete a pre-construction survey and install shut off valves. The contractor will deliver a pre-construction survey request to schedule a time to complete the survey.</p>
	<p>Water Service Disruptions: From time-to-time, the water supply to your property will need to be shut-off to complete construction; the contractor will provide at least 24-hour advance notice. Throughout the work, it is recommended that you temporarily disconnect any water treatment systems (i.e. softeners or filters), water-cooled air conditioners or similar plumbing fixtures. Automatic lawn sprinkler systems may also be affected, therefore, you may need to water manually. In the event you did not receive advanced notice, an emergency water shut off could have been necessary.</p>
	<p>Substandard Water Service Replacement: Please take the time to read the attached fact sheet carefully as it contains important information on lead in drinking water and how to prepare for replacement. If you want to replace your part of the water service pipe, you contact the City's contractor for one of your quotes.</p> <p>Water Service Replacement Contractor: Company/Contractor: Aquarehab Contact Person: Yvan Tasco Phone: 1-450-687-3472 Contract No.: 16TW-OS-27CWD</p> <p>PLEASE NOTE: Homeowners are encouraged to obtain several quotes before selecting a contractor. The City is not able to get involved in any contract for work done on private property. Homeowners are responsible for ensuring contractors do not interfere with the work being done on City property.</p>
	<p>Road and Sidewalk Access: In order to complete the work in a safe manner, there will be road and sidewalk restrictions within the construction work zone. Access for emergency vehicles will be maintained at all times.</p> <p>Driveway Access: The contractor will notify you of any temporary restrictions to your driveway access. If your property has two entrances, one entrance will be kept open at all times.</p>
	<p>Traffic Management: Efforts have been made to manage traffic in the area for the safety of workers, road users and residents. Road users should expect delays and increased traffic on nearby main and side streets.</p>
	<p>Parking: Parking in the active work zone is not permitted due to space requirements for construction equipment and materials. If your parked vehicle affects the construction work, it will be re-located with no charge to the owner. If your vehicle is moved, please contact parking control for its location at 416-808-2222.</p> <p><i>In the event you receive a traffic ticket for on-street parking during this period of construction, please immediately contact the Field Ambassador listed on the next page so that your ticket can be cancelled.</i></p> <p>Please note that parking tickets cannot be cancelled if vehicles were parked in illegal parking spots such as in front of a fire hydrant or in no parking zones, or if they are submitted to the Field Ambassador later than three days after receipt.</p>
	<p>Garbage & Recycling: Please follow your normal routine. If required, the contractor will move bins to an appropriate location and return them. <i>Please ensure that you label your bins with your address.</i></p>

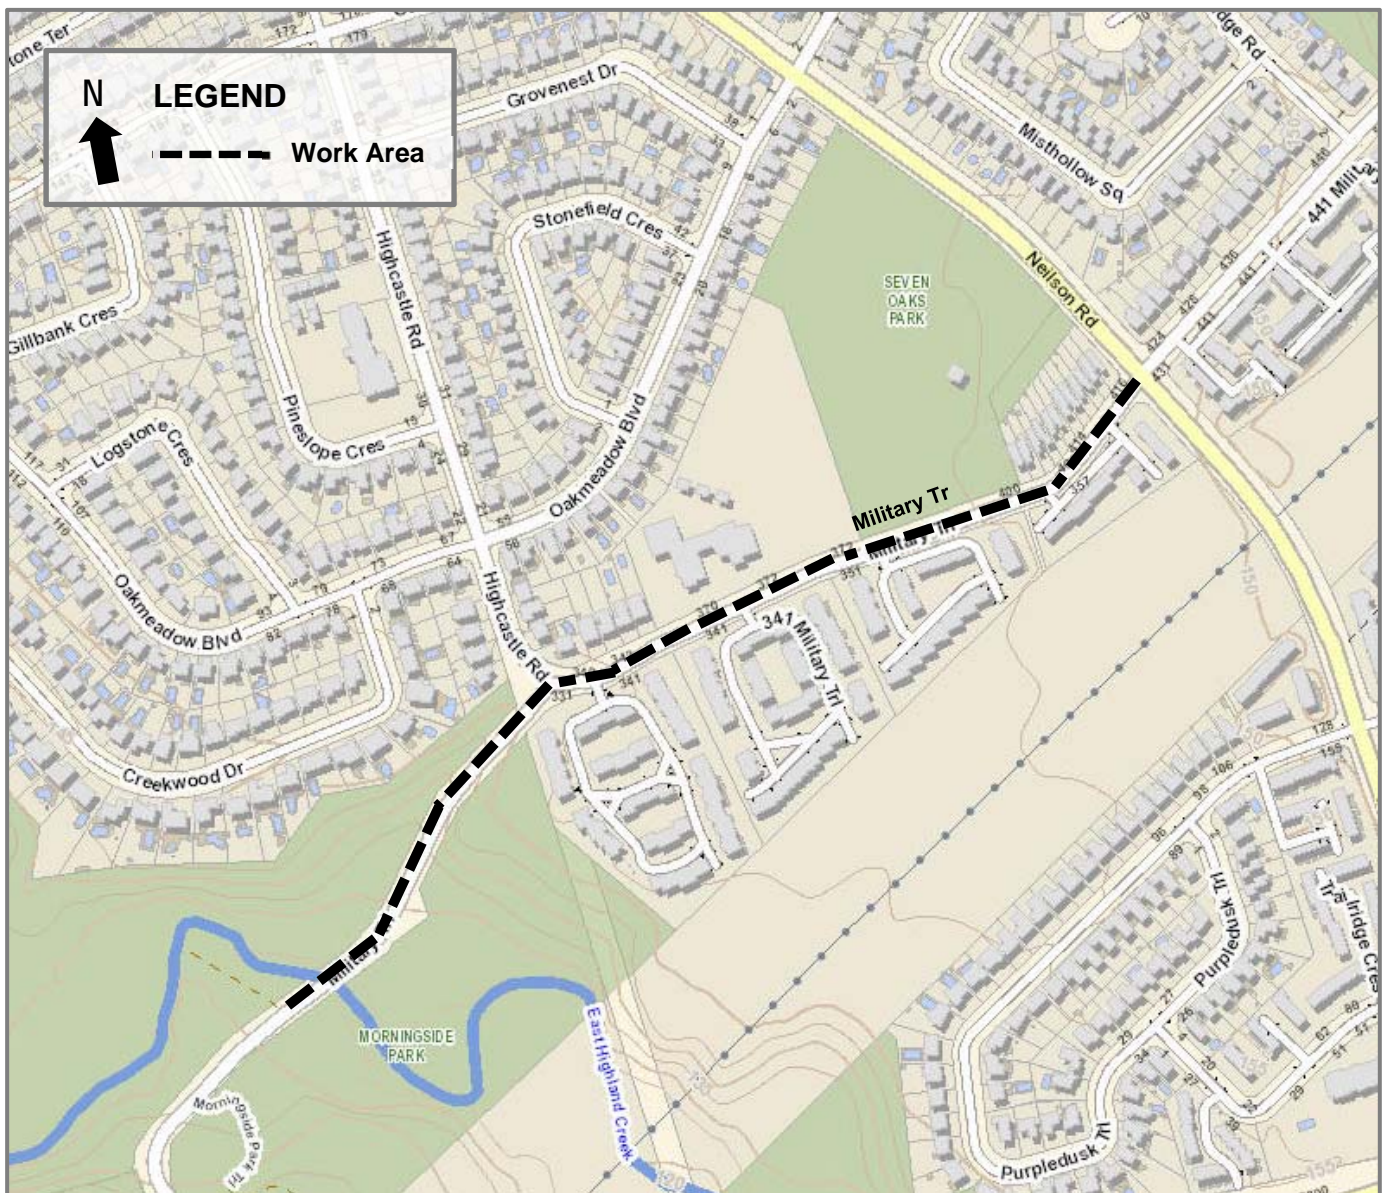

Restoration: The construction work area will be restored with sod and/or asphalt where required. Interlocking bricks, flagstone on a granular base, or other similar features that are removed from public and private property during construction will be replaced. Lawn seeding and/or laying of sod will be done as needed during ideal growing seasons only - in the spring (April to June) and fall (September to October). Permanent restoration of the curb and sidewalk will take place within 18 to 24 months.
