

Toronto Water is responsible for providing services to Toronto residents and businesses including water treatment and supply (also to parts of York Region); wastewater collection and treatment (also to a portion of Peel Region); and stormwater management. The division maintains and services assets worth approximately \$28 billion, some of which includes four water and four wastewater treatment plants, approximately 6,000 kilometers of watermains, 4,100 kilometers of sanitary sewers, 5,000 kilometers of storm sewers and 1,400 kilometers of combined sewers.

Customer & Technical Support

Customer & Technical Support provides a broad range of services to support both external customers and internal Toronto Water operations. We are responsible for external customer service programs, field service dispatch, locates, water & wastewater service investigations and water meters. We are also responsible for capital works delivery, integrated technology management, process control systems, and enterprise work management system project delivery for Toronto Water.

Water Infrastructure Management

Responsible for plant and linear infrastructure asset master planning, we maintain inventories of Toronto Water's assets and ensure existing infrastructure has adequate capacity and is in good repair. We plan for future growth; prepare the annual capital program for infrastructure repairs, replacement and rehabilitation; and help protect our water resources through new policies, programs, technology and environmental assessments.

Water Treatment & Supply

We treat, transmit, store and distribute potable (drinkable) water to all industrial, commercial and household water users in the City of Toronto. We also deliver water to a major portion of the Region of York. Our challenge is to meet water demands throughout the year, complying with provincial regulations and working responsibly to protect the environment and local water bodies.

Metro Hall
18th fl., 55 John St.
Toronto ON M5V 3C6

Facsimile.....392-3639

Director
