Watermain Replacement on Danby Avenue and Harlock Boulevard

Contract: 16ECS-LU-05SU

Start Date: May 9, 2016

End Date: July 2016

**Timeline is subject to change.*

The City of Toronto will replace the watermain and the City-owned portion of substandard water services on Danby Avenue from Harlock Boulevard to Bathurst Street and on Harlock Boulevard from Almore Avenue to Danby Avenue starting in May.

The water service is the underground pipe that brings water to your water meter and is owned by you and by the City. The part you own is from your house to the end of your property, the part the City owns is from the end of your property to the watermain.

This project is part of the Council-approved 2016 Capital Works Program to renew our aging infrastructure, improve water distribution and reduce the risk watermain breaks.

IMPORTANT INFORMATION ABOUT LEAD WATER SERVICES

If you live in a house that was built before the mid-1950s, your water service may be made of lead. Please read the attached fact sheet with important information about the risks of lead in drinking water, especially if someone in your house is pregnant, there are children under six years old, or there is an infant drinking formula made from tap water.

MAP OF WORK AREA

WORK DETAILS

In the first few weeks, the City's contractor will move equipment on-site and prepare the work area before construction begins. Construction crews will then:

- Excavate the road and dig a trench to access and install the new watermain
- Replace any City-owned water service pipes that do not meet City standards from the watermain to the private property line
- Restore all work areas with asphalt, concrete or grass when the underground works are complete
- Resurface the road

WHAT TO EXPECT DURING CONSTRUCTION

- You may experience dust, noise and other inconveniences. The City will make efforts to reduce the impacts. We appreciate your patience.
- Property owners should remove items located within City property limits (boulevard), such as landscaping and / or decorative objects. If you have a sprinkler system within the boulevard, please contact the Field Ambassador.
- The City will not be responsible for damage to any privately owned items on City property.

	<p>Work Hours: Work will take place from 7:00 am to 7:00 pm., Monday to Saturday, with work after hours and on weekends as required.</p>
	<p>Pre-Construction Inspection: OZA Inspections Ltd., under contract to the City of Toronto, will survey all properties within 30 metres of the construction area before construction starts. Participation in the survey is voluntary; however, participating is important in determining if the construction caused damage. The inspection will look at both the interior and exterior of all properties to verify existing conditions. The company will deliver a separate notice requesting time to set up appointments. All inspection staff will be wearing photo identification and carrying photographic equipment during their work.</p>
	<p>Water Service Disruptions: From time-to-time, the water supply to your property will be shut-off to complete construction; the contractor will provide at least 24-hour advance notice. Throughout the work, it is recommended that you temporarily disconnect any water treatment systems (i.e. softeners or filters), water-cooled air conditioners or similar plumbing fixtures. Automatic lawn sprinkler systems may also be affected, therefore, you may need to water manually. In the event you did not received advanced notice, an emergency water shut off could have been necessary.</p>
	<p>Substandard Water Service Replacement: Please take the time to read the attached fact sheet carefully as it contains important information on lead in drinking water and how to prepare for replacement. If you want to replace your part of the water service pipe, contact the City's contractor for one of your quotes.</p> <p>Water Service Replacement Contractor: Company/Contractor: CG Construction Services Ltd. Phone: 905-471-4400 Contract No.: 16ECS-LU-05SU</p> <p>PLEASE NOTE: any contract entered into to replace water services is between the home owner and the contractor.</p>
	<p>Road and Sidewalk Access: In order to complete the work in a safe manner, there will be road and sidewalk restrictions within the construction work zone. Access for emergency vehicles will be maintained at all times.</p> <p>Driveway Access: The contractor will notify you of any temporary restrictions to your driveway access. If your property has two entrances, one entrance will be kept open at all times.</p>
	<p>Traffic Management: Efforts have been made to manage traffic in the area for the safety of workers, road users and residents. Some of these efforts include adding Local Access signs, revising traffic signal times. Road users should expect delays and increased traffic on nearby main and side streets.</p> <p>Traffic on Danby Avenue and Harlock Boulevard may be reduced to one lane.</p>

	<p>Parking: Parking in the active work zone is not permitted due to space requirements for construction equipment and materials. If your parked vehicle affects the construction work, it will be re-located with no charge to the owner. If your vehicle is moved, please contact parking control for its location at 416-808-2222.</p> <p><i>In the event you receive a traffic ticket for on-street parking during this period of construction, please immediately contact the Field Ambassador listed below, so that your ticket can be cancelled.</i></p> <p>Please note that parking tickets cannot be cancelled if vehicles were parked in illegal parking spots such as in front of a fire hydrant or in no parking zones, or if they are submitted to the Field Ambassador later than three days after receipt.</p>
	<p>Garbage & Recycling: Please follow your normal routine. If required, the contractor will move bins to an appropriate location and return them. <i>Please ensure that you label your bins with your address.</i></p>
	<p>Restoration: The construction work area will be restored with sod and/or asphalt where required. Interlocking bricks, flagstone on a granular base, or other similar features that are removed from public and private property during construction will be replaced. Lawn seeding and/or laying of sod will be done as needed during ideal growing seasons only - in the spring (April to June) and fall (September to October).</p>
	<p>TTC Service: This project may affect travel times on the 7 and 160 bus routes. Visit ttc.ca for accurate schedule information.</p>

ASBESTOS IN ASPHALT

As part of the work, the City must test the removed asphalt to be removed for asbestos. Our tests have identified that low levels of asbestos are present in the asphalt pavement on Danby Avenue and Harlock Boulevard, which are significantly below levels of concern to the Ministry of Labour.

Asbestos was used in asphalt mixes throughout the 1970s and early 1980s to improve the performance of the asphalt. Air quality monitoring conducted by the City of Toronto at other sites has not detected asbestos fibres in the air as a result of resurfacing of asphalt. The risk of exposure to asbestos for workers and bystanders is low.

As a precaution, the City's contractor will follow these steps:

- Wet the pavement during asphalt cutting, grinding or removal
- Attach dust collecting devices with HEPA filters to equipment, where possible, to prevent dust from becoming airborne
- Provide personal protective equipment, such as disposable coveralls and respirators, to on-site workers upon request, and
- Transport and dispose of asphalt containing asbestos at provincially approved disposal sites.

NEED MORE INFORMATION?

If you have questions about the upcoming work, please contact us and quote **16ECS-LU-05SU**.

Condition Survey / Inspection

Dear Resident:

The City of Toronto is preparing to replace the watermain and the City-owned portion of substandard water services on Danby Avenue from Harlock Boulevard to Bathurst Street and on Harlock Boulevard from Almore Avenue to Danby Avenue starting in May (see attached Construction Notice for additional information).

Due to the nature of this work and possibility of vibration, the City's Contractor, CG Construction Services Ltd., has hired OZA Inspections Ltd. to complete pre-construction surveys of all properties within 30 metres of the construction area.

Participation in the survey is voluntary. The benefit to homeowners who participate is that pre-construction survey results may be of use to substantiate claims for damage caused by City construction. The benefit to taxpayers in the City of Toronto is the surveys helps protect against fraudulent claims against the City.

OZA Inspections Ltd. will follow up with a request to set up an appointment. All inspection staff will be wearing photo identification and carrying photographic equipment during their work. The information gathered during this survey will be kept confidential.

If you have questions about the upcoming work or these inspections, please contact us.
