## Road & Sidewalk Reconstruction, Water Service Replacements on Gloucester Grove Road

**Contract #: 17ECS-TI-03LR**  
**Expected Start Date: Summer, 2017**  
**Expected End Date: Fall 2017**

*\*Timeline is subject to change. Future notice to be provided.*

The City of Toronto is planning to reconstruct the road and sidewalk and replace the City-owned portion of substandard water services on Gloucester Grove. Our inspection of the road shows that it needs reconstruction, and curb and sidewalk need to be replaced to bring them to a state of good repair.

The water service is the underground pipe that brings water to your water meter and is owned by you and by the City. The part you own is from your house to the end of your property, the part the City owns is from the end of your property to the watermain.

This work is part of the Council-approved 2017 Capital Works Program to renew aging city roads, sidewalk and improve water services for current and future needs.

### IMPORTANT INFORMATION ABOUT LEAD WATER SERVICES

If you live on Gloucester Grove in a house that was built before the mid-1950s, your water service may be made of lead. Please read the attached fact sheet with important information about the risks of lead in drinking water, especially if someone in your house is pregnant, there are children under six years old, or there is an infant drinking formula made using tap water.

### MAP OF WORK AREA

## WHAT TO EXPECT BEFORE CONSTRUCTION

- Work crews will mark sidewalks and curbs requiring replacement and the locations of underground utilities, such as gas, water and cable so that the construction work does not interfere with these utilities.
- Affected streets will receive a Construction Notice approximately two weeks before work begins with more information about the work.
- Work in the boulevard in front of homes and commercial properties is expected. This work includes removing and replacing driveways, municipal sidewalks and grassed boulevards, where necessary.
- Property owners should remove items located within City property limits (boulevard), such as landscaping and or decorative objects before work starts. If you have a sprinkler system within the boulevard, please contact the Project Engineer listed below.

	<p><b>Substandard Water Service Replacement:</b> Please read the attached fact sheet as it contains important information about lead in drinking water and water service replacement. Find out if your water service is lead – a licensed plumber can help you with this. If it is lead, the City of Toronto encourages you to replace it. We recommend you obtain several quotes and you can contact the City's contractor for one of your quotes. Approximately two weeks prior to construction, you will receive a "Construction Notice" with the name and phone number of the City contractor. Learn more at <a href="http://toronto.ca/leadpipes">toronto.ca/leadpipes</a></p>
	<p><b>Pre-Construction Inspection:</b> An inspection company under contract to the City of Toronto, will survey all properties within 30 metres of the construction area before construction starts. Participation in the survey is voluntary; however, participating is important in determining if the construction caused damage. The inspection will look at both the interior and exterior of all properties to verify existing conditions. The company will deliver a separate notice requesting time to set up appointments. All inspection staff will be wearing photo identification and carrying photographic equipment during their work.</p>
	<p><b>Accessible Accommodation:</b> Residents who require accommodation (level entry, longer notice, etc.) must contact the Project Engineer to arrange for access during the construction period.</p>
