Sanitary Sewer Replacement on Wye Valley Road from 83m North of Shropshire Drive to Glaive Drive.

Contract #: 16ECS-LU-06SU

Start Date: Spring 2017

End Date: Fall 2017

**Timeline is subject to change. Future notice to be provided.*

The City is replacing the sanitary sewer along Wye Valley Road from 80 metres north of Shropshire Drive to Glaive Drive. This work will also involve replacing the City-owned portion of substandard water services to improve the water distribution system and drinking water quality and replacement of the sanitary laterals.

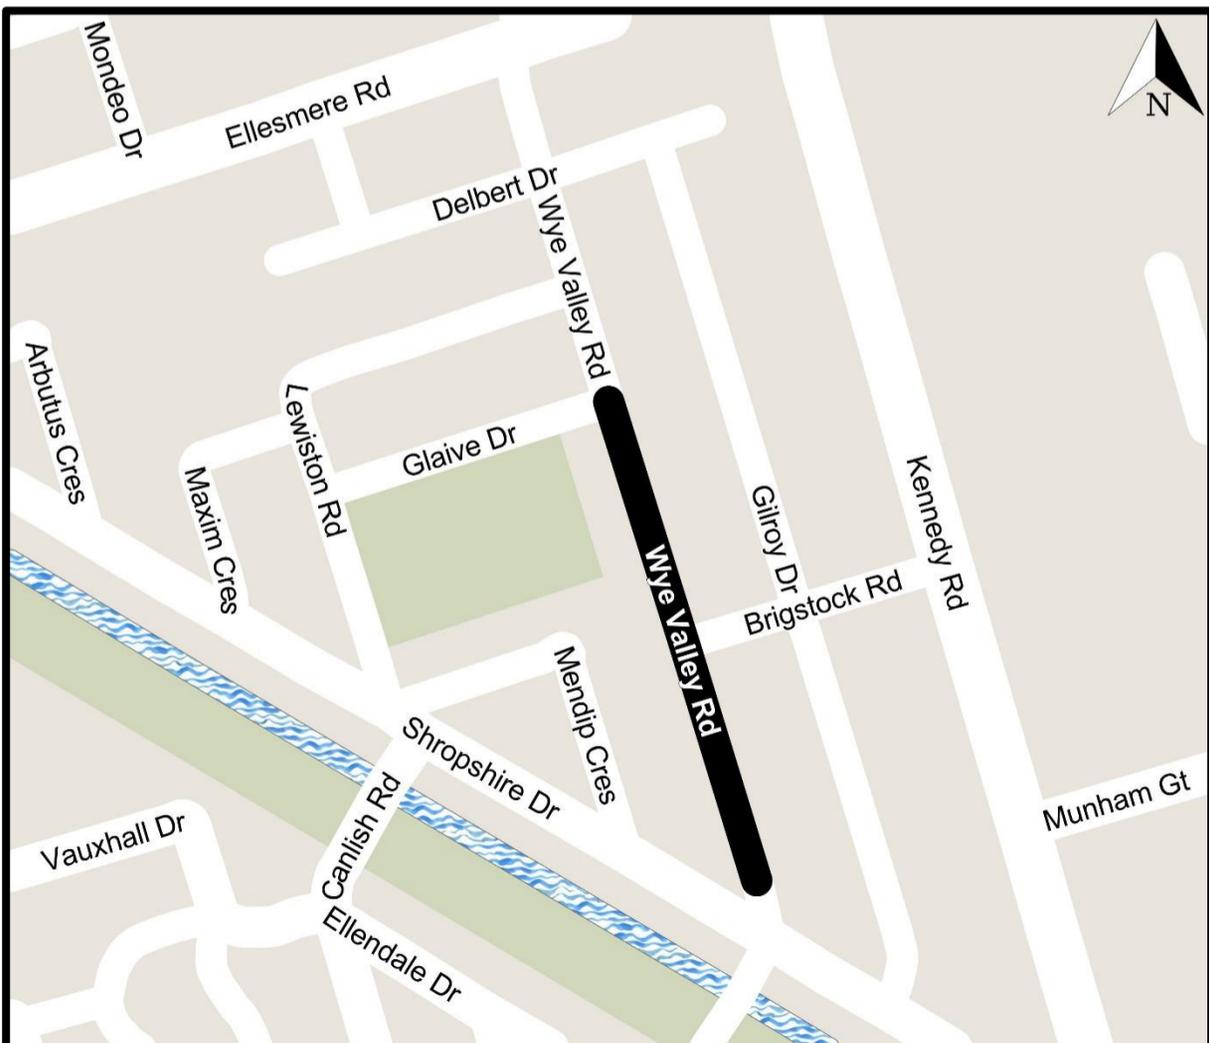

The sanitary service lateral is the pipe connecting your home's plumbing to the City's sewer, the water service underground pipe brings water to your water meter; both of these pipes are owned by you and by the City. The part that you own is from your house to the end of your property, the part the City owns goes from the sewer and watermain to your property line.

This project is part of the Council-approved 2017 Capital Works Program to improve water distribution, renew aging infrastructure reducing the risk of sewer collapse or blockages that cause sewer backups and rehabilitate and upgrade our roads for current and future needs.

IMPORTANT INFORMATION ABOUT LEAD WATER SERVICES

If you live in a house that was built before the mid-1950s, your water service may be made of lead. Please read the attached fact sheet with important information about the risks of lead in drinking water, especially if someone in your house is pregnant, there are children under six years old, or there is an infant drinking formula made from tap water.

MAP OF WORK AREA

WHAT TO EXPECT DURING CONSTRUCTION

- Work crews will mark sidewalks and curbs to be replaced and underground utilities, such as gas, water and cable.
- A Construction Notice will be delivered to the entire community approximately two weeks before work begins with an exact start date and details about the work.
- Further notice will be provided to property owners who must remove items located within City property limits (boulevard), such as decorative objects. If you have a sprinkler system within the boulevard, please contact the Field Ambassador listed below.

	<p>Pre-Construction Inspection: Oza inspections Ltd., under contract to the City of Toronto, will survey all properties within 30 metres of the construction area before construction starts. Participation in the survey is voluntary; however, participating is important in determining if the construction caused damage. The inspection will look at both the interior and exterior of all properties to verify existing conditions. The company will deliver a separate notice requesting time to set up appointments. All inspection staff will be wearing photo identification and carrying photographic equipment during their work.</p>
	<p>Substandard Water Service Replacement: Please read the attached fact sheet as it contains important information about lead in drinking water and water service replacement. Find out if your water service is lead – a licensed plumber can help you with this. If it is lead, the City of Toronto encourages you to replace it. We recommend you obtain several quotes and you can contact the City's contractor for one of your quotes. Approximately two weeks prior to construction you will receive a "Construction Notice" with the name and phone number of the City contractor. Learn more at www.toronto.ca/leadpipes</p>
