

Construction Activities on Gerrard St. E. : New Transmission Watermain Progress Update

Contract #15ECS-LU-02TT

The City of Toronto and its contractor, Clearway Construction Inc., will continue the installation of a new Transmission Watermain around the Victoria Park Ave. and Gerrard St. E. area. The contractor has completed all underground installation and road repairs on Victoria Park Ave. and continues to work diligently to complete the work on Gerrard St. E. prior to any severe winter weather conditions.

The contractor has completed all underground works west of Victoria Park Ave. along Gerrard St. E. and is beginning road restoration works shortly. The contractor will ensure access to driveways is maintained throughout this process. There may be situations in which driveway access may be restricted during restoration activities. During these situations, a notice will be provided for the homeowner to move their vehicles for short periods of time while restoration work is completed.

The contractor hopes to have most of the area restored in the next four to six weeks west of Victoria Park Ave. on Gerrard St. E.

We thank you for your patience while we provide updated underground infrastructure to the City of Toronto.

You may contact the following individuals with any questions or concerns regarding this notice.

Thank you for your co-operation.
